

The Caspian:

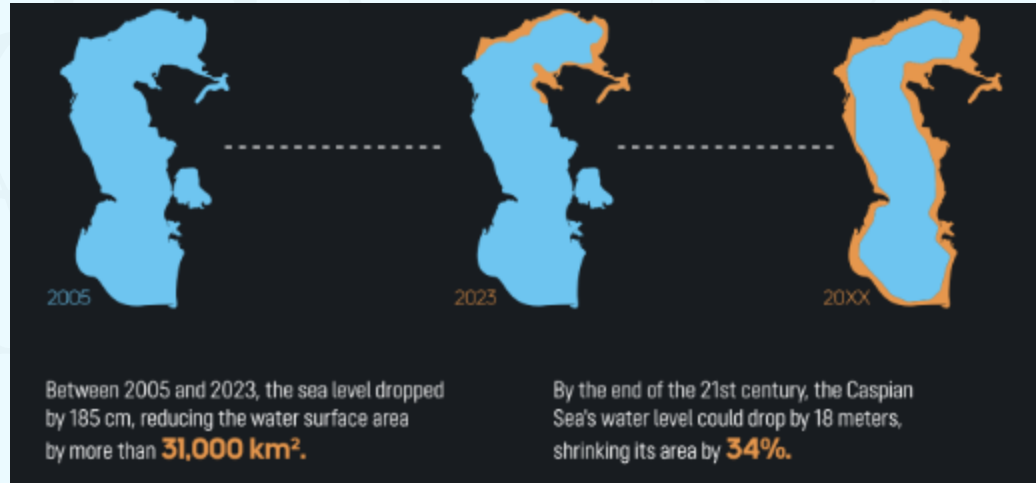

Bringing the triple planetary crisis to light

Dina Ni, SCS Communications Specialist

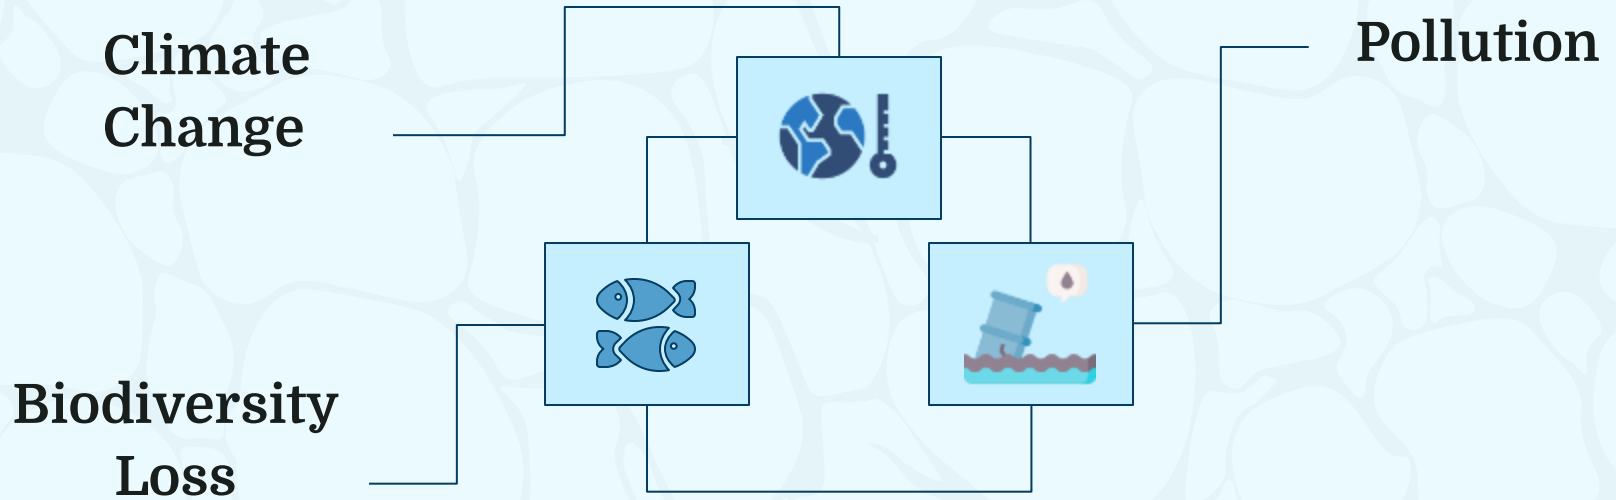

About the Caspian

Caspian Sea is the **largest enclosed body of water on Earth**, covering about **370,000 square kilometers** — larger than Germany. It lies **28 meters below sea level**, nestled between **Azerbaijan, Iran, Kazakhstan, Russia, and Turkmenistan**.

Caspian Crisis Explained: Threats

Up to 18 m

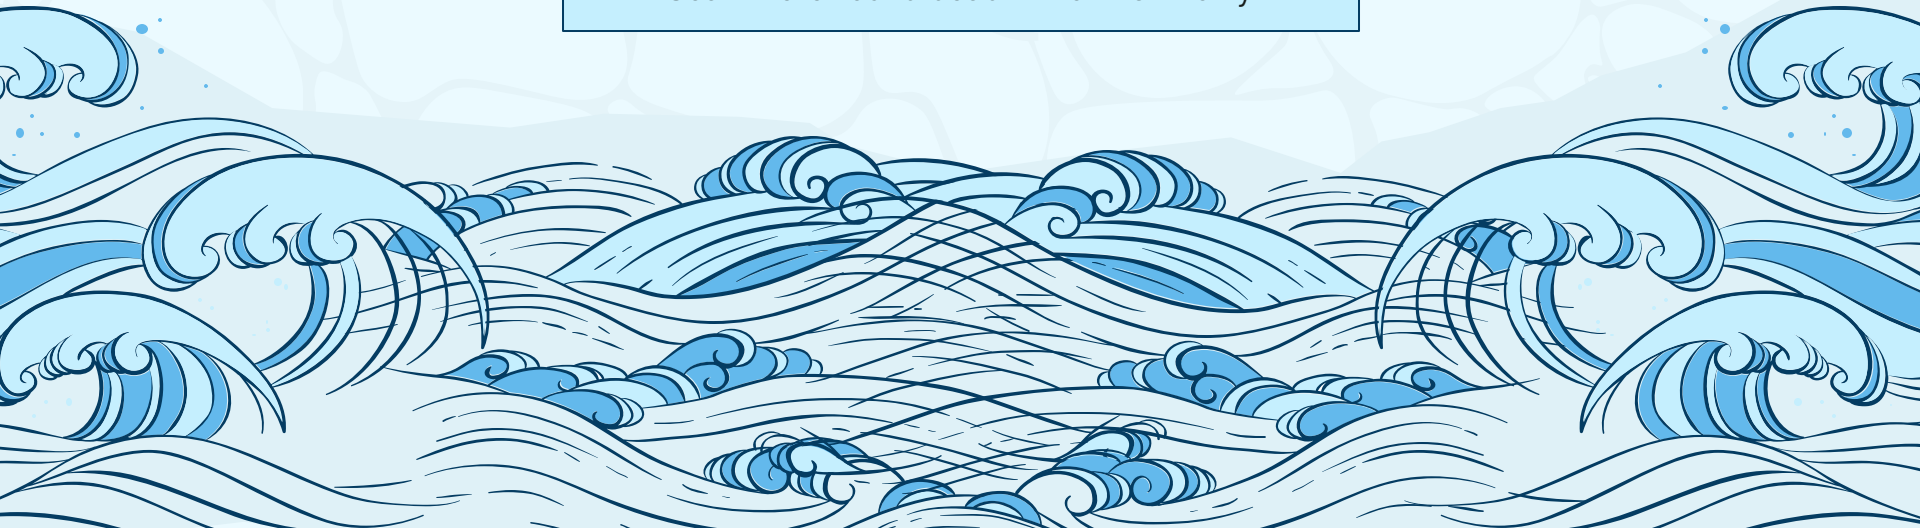

The Caspian Sea projected to drop by 2100

90 %

Decline in the populations of sturgeons & seals

Over 2000

Seals were found dead in Nov 2022 only

From Outrage to Action

- Founded in December 2024
- Brings together experts, activists, creative professionals and concerned people
- 3 pillars of our campaign: transparency, accountability & action

Our objectives

Hold corporations
accountable

Raise awareness about the
issue

Advocate for stronger
policies

Mobilize
public support

Our Directions

Accountability

Resorting to legal
tools

01

Transparency

Raising awareness
using media & SoMe

02

Action

Online & Offline
events

03

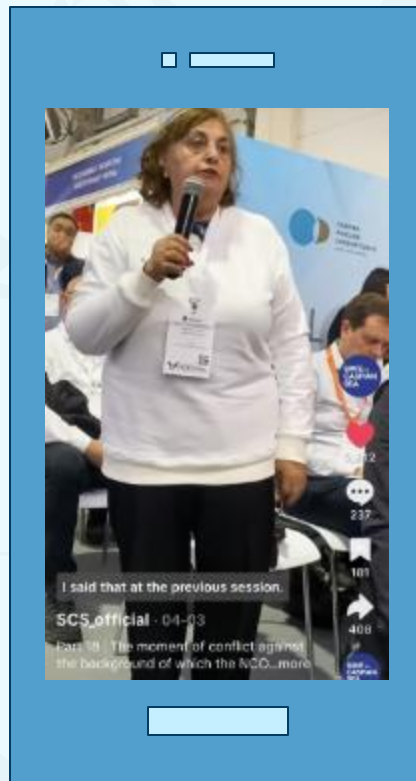

Context:

- **Jan 2025:** Kassym-Jomart Tokayev called for a revision of PSAs
- **April 2025:** Media investigation about a classified \$160 billion arbitration between the government and NCOC
- **Sept 2025:** Tokayev called for for an interstate program and even a new regional Center for Water Issues

Calling for transparency online & offline

In April 2025 one of our team members,
Galina Chernova, directly questioned oil &
gas representatives about their
environmental monitoring & compliance

To Protect the Sea, the Kazakh Government Must Disclose Caspian Oil Agreements

The Caspian Sea is a unique and irreplaceable natural treasure. Protecting it means holding polluters accountable, and that requires transparency.

Vadim Ni
April 12, 2025

Roadmap: “10 Steps to Save the Caspian”

1. Create an **open environmental monitoring system** with real-time data.
2. Ensure **transparency of environmental and financial reporting** by companies.
3. Introduce **international standards** for safety and accountability.
4. Expand **protected natural areas**.
5. Support a **just transition** for affected communities.
6. Involve **citizens** in decision-making.
7. Promote **corporate responsibility** and **green investment**.
8. Strengthen **international coordination**.
9. Advance **scientific research and clean technology**.
10. Expand **environmental education** and public awareness.

Thanks!
