STUDY TOUR TO THE CZECH REPUBLIC 12 to 20 October 2024

Study tour is organized in frame of the project “Green restoration of Ukraine: Sustainable recovery of war-affected regions” supported by the Transition Promotion Program of the Ministry of the Foreign Affairs of the Czech Republic. The participants will be representatives of communities (hromadas), municipalities and local civic initiatives. The program will be focused on practical examples of sustainable development of municipalities, specific ecological measures and projects, sharing the experiences of local action groups, financing projects and creating new partnerships between municipalities in the Czech Republic and Ukraine.

PRACTICAL INFORMATION

The study tour is jointly organized by Arnika and the team of the Clean Air for Ukraine programme. Travel expenses as well as accommodation, diet and secure travel insurance is covered by these organizations. Accommodation will be rather modest and in shared rooms.

During the study tour we will spend a lot of time outside, please be prepared for different weather (the agenda might change in case of extremely bad weather conditions). Recommended equipment: outdoor clothes including rainproof shoes and jacket/raincoat, water bottle, a small backpack for shorter trips, an umbrella.

The excursions will be in Czech or English always with interpretation to Ukrainian. Participants will arrive by train; within the Czech Republic we will travel by rented bus.

AGENDA

The route framework: <https://mapy.cz/s/fenosacucu>

SUNDAY OCTOBER 13 / ARRIVAL TO BRNO, ACCOMODATION

Arrival to Brno main train station cca at **8 am**.

Accommodation: Hostel Eleven, adress: Dominikánská 19, Brno

Free time, joint dinner.

MONDAY OCTOBER 14 / CZECH HYDROMETEOROLOGICAL INSTITUTE, HOSTĚTÍN VILLAGE

8:00 Breakfast

8:45 Transfer via public transport to CHI

9:30-11:30 Excursion to the Czech Hydrometeorological Institute (CHI)

We will discuss air quality monitoring in the Czech Republic and the way how the CHI communicates with municipalities and with public. We will see the monitoring station located within the Institute building.

12-13 Lunch

13-15 Transfer to Hostětín by rented bus.

15-18 Excursion in Hostětín village

Hostětín is a small village with an unusual concentration of model ecological projects - a biomass heating plant with heat distribution system for 80% of households, a wastewater root (vegetation)
